CloudShield Phishing Identification Guide

CloudShield Enterprise Cyber Defense Document

1. Inspect the full sender email header, not just the display name.
2. Scrutinize lookalike domains (e.g. micr0soft.com, accounts-alerting.net).
3. Identify artificial urgency tactics (immediate wire, account suspension).
4. Verify all external links by hovering before clicking.
5. Never enter corporate credentials on unexpected third-party pages.
6. Use the CloudShield ’Report Phish’ button immediately when in doubt.
