Enterprise Information Security Policy

CloudShield Enterprise Cyber Defense Document

SECTION 1: PURPOSE & SCOPE

This policy outlines corporate cybersecurity requirements for all employees.

SECTION 2: ACCESS CONTROL & CREDENTIAL PROTECTION

All access to corporate cloud resources requires Multi-Factor Authentication.

Root credentials and API keys must never be committed to source code repositories.

SECTION 3: THREAT MONITORING

CloudShield continuously monitors API request bursts and perimeter IP breaches.

Violations are automatically converted into SOC incidents with risk penalties.
