Employee Security Incident Response Playbook

CloudShield Enterprise Cyber Defense Document

PHASE 1: DETECTION & IMMEDIATE CONTAINMENT

- If you clicked a malicious link or entered credentials, disconnect Wi-Fi/VPN.

- Immediately report the incident to SOC via CloudShield Mail -> Report Phish.

PHASE 2: INVESTIGATION & TRIAGE

- SOC analysts correlate events across DynamoDB and Amazon EventBridge.

- Threat scoring algorithm assigns severity (LOW, MEDIUM, HIGH, CRITICAL).

PHASE 3: REMEDIATION & RECOVERY

- Revoke affected session tokens and reset single sign-on credentials.
